

Local Impact Workshop

Saturday 3:00 PM · IBM · Google · Baz

Today's workshop

- 01 Compass Detroit
- 02 The Local Impact track
- 03 IBM: register, team, learn
- 04 Google Cloud credits
- 05 GitHub + Baz code review
- 06 What to submit

Who we are

Compass Detroit unites Michigan's **STEAM** **communities.**

A 501(c)(3) coalition since 2018 · Innovation Summits · Michigan DevFest + AI
Hackathon · Hack Michigan · Scholarships

Join us: bit.ly/compass2026 · whatupdoe@compass-detroit.com

01 The Local Impact track

Local Impact Track

Build something that makes life measurably better for people in Ann Arbor and Washtenaw County.

The one rule: talk to someone who has the problem. Judges will ask who you built it for, and “everyone” is the wrong answer.

Worksheet: [tracks/local-impact.md](#)

- **Getting around:** transit, parking, biking, the last mile
- **Main Street:** help local businesses reach passersby
- **Showing up:** connect volunteers, mentors, donors
- **Access:** food, housing, benefits, childcare
- **Civic clarity:** make local data and decisions legible
- **Belonging:** help people find each other

How you'll be judged

IBM platform rubric: 25 points

Five criteria, 5 points each. Your score is the average of the judges' scores.

- Local Impact Grand Prize: local relevance, technical execution, and a path to exist after the weekend
- Community Favorite: the room votes

Criterion	Pts	Ask yourself
Completeness	5	Is the proof of concept complete, with IBM tech clearly applied?
Creativity	5	Is the approach original and differentiated?
Design + usability	5	Could real users adopt it quickly?
Effectiveness	5	Does it solve a real priority, measurably?
Michigan impact	5	Does it keep value, jobs, and opportunity here?
Total	25	Average of judges' scores

02 IBM: register, team, learn

Step 1: Register with IBMid

ibm.biz/a2tech360 is your home for IBM cloud accounts, education, and teams.

1. Register or sign in with IBMid (university or company email).
2. Explore Details, My Team, Education, and Schedule.
3. When hacking opens, follow “Complete the hackathon” to get your team’s IBM Cloud account.

Scan to register

Step 2: Form your IBM team

Pick a Team Lead

The creator is Lead and manages the submission.

Invite teammates

By email, or browse Invite Members.

Accept the invite

One team per person; all must register.

Create the team

My Team → Create a Team → name it → Create Team.

Need people?

Try Find Members or Find a Team (AI Assisted).

Step 3: Your IBM toolkit

Tool	What it does	Where to find it
IBM Bob	AI coding assistant (40 Bobcoins trial)	bob.ibm.com/trial
watsonx.ai + Granite	Prompt Lab and API for foundation models	dataplatform.cloud.ibm.com
watsonx Orchestrate	Build and deploy AI agents	Resource list → AI / ML
Cloudant	JSON database for app data	Resource list → Databases
Code Engine	Serverless deploys for your app	Resource list → Code Engine
Your credits	\$100 per team account	Alerts at 25%, 50%, 80%

Step 4: Learn fast on the Education tab

Meet IBM Bob

Meet Bob (9 min) and
Build with Bob tech talk
(21 min)

- Bob courses on IBM SkillsBuild

watsonx.ai + agents

watsonx.ai overview (6 min) and Prompt Lab (3 min)

- Lab: ReAct agent with IBM Granite (30 min)

watsonx Orchestrate

Get to know Orchestrate (6 min) and multi-agent guide (7 min)

- ADK guide for Python agents (optional)

ibm.biz/a2tech360 → Education tab

03 Google Cloud credits

Claim \$25 in Google Cloud credits

Claim them now: vouchers expire when the event ends.

1. Join the Google Group with a personal @gmail.com.
2. Open the credits link, sign in, claim your badge.
3. Verify on your phone, then wait 2-5 minutes.
4. Create a Cloud project on the credits billing account.

Video walkthrough in repo

1. Join the group
[groups.google.com/g/
a2tech360-hackathon](https://groups.google.com/g/a2tech360-hackathon)

2. Claim credits
[g.dev/credits/
a2tech360-hackathon-2](https://g.dev/credits/a2tech360-hackathon-2)

Stuck? CRED-101: use a personal Gmail. CRED-103: refresh or use mobile data.

04 GitHub + Baz code review

Get set up on GitHub

Use the starter kit for guides, then build in a team repo in the A2Tech360 org.

1. Open the starter kit and star it.
2. Create your team repo in the A2Tech360 org.
3. Make it public and add your teammates.
4. Open pull requests; Baz reviews them automatically.

Also star [jaseci-labs/jac](#)

Starter kit

**[github.com/A2Tech360/
a2tech360-hackathon](https://github.com/A2Tech360/a2tech360-hackathon)**

Baz AI code review

Baz is installed on the A2Tech360 GitHub org. Every pull request gets an AI code review.

Required for Local Impact projects. Fewer demo-breaking bugs, and a clean history for judges.

1. **Branch:** git checkout -b feature/idea
2. **Commit** and push your work
3. **Open a PR** into main
4. **Read Baz's review**, fix, push again
5. **Merge small PRs** often

Guide: [docs/baz-code-review.md](#)

What to submit

5-minute presentations

3-4 min presentation

1-2 min video demo

**Local Impact teams submit at
ibm.biz/a2tech360**

1. Written problem and solution statements
2. How you used IBM and/or Google technologies
3. GitHub repo URL (A2Tech360 org preferred)
4. URL to a 1-minute recorded demo video

Everyone also submits on Devpost

Michigan DevFest + AI Hackathon
